Edge Case 3 : Wrong Date Format

The screenshot shows a code editor interface with a dark theme. The top bar includes a file explorer icon, a menu icon, and tabs for 'New' and 'main'. The left sidebar contains icons for file explorer, search, and other development tools. The main area displays the output of a Python script execution. The command line shows the script being run from a specific directory. The output text includes a title, prompts for report type and dates, and an error message for an invalid date format.
